Instructions to Post

Print and display the label in a clearly visible location near each public entrance by October 31 of every year:

- The Building Energy Efficiency Rating label is designed to be accessible to all building owners with minimal cost to comply. A printed 8" x 11" paper label is acceptable.
- Framing/laminating the label is suggested, but not required, as long as all information included in the label is clearly visible for the entire year.
- Print the label in color (recommended) or in greyscale.
- Display the label in an internal or external location near each public entrance so it is visible to the public.
- Put the label at a vertical height no less than four feet and no more than six feet from the ground or floor.
- The label should not be defaced, marred, camouflaged or hidden from public view.
- Replace the label every year with the latest issued version.
